

PRO-AT35L

ACOUSTIC AIRTUBE WITH 3,5 MM L-CONNECTOR

The well known classic Acoustic airtube

This is a version of an earphone where the sound is generated in a transducer and then transmitted to the ear via an air tube.

It is discrete and comfortable to wear.

There are also other types of eartips that can be used depending on what the user prefers or have different characteristics like full ambient listening or blocking the ambient sounds.

FEATURES & BENEFITS

- Coiled airtube made of hypoallergenic silicone.
- Adjustable for different ear sizes (cut the airtube to suitable length).
- Adjustable for left or right side (twist and adjust the L-formed joint).
- The loudspeaker part has an integrated clip that typically be clipped to the collar.
- Normally delivered with 3 sizes of eartips, 1-,2- or 3-flange versions, can be replaced with optional eartips.
- Standard eartips blocks the ambient sound to make it easier to her the incoming audio in noisy environments.
- 3½ mm connector compatible with the earpiece jack in RSMs/adapters
- Angled connector makes the connector to sit firmer in the jack to avoid that it accidently gets pulled out of the jack. With some accessories it can be locked in place.
- Listen only accessory – for transmission the terminal's internal microphone are used.

SPECIFICATION

Impedance 90 ohm

Cable lenght 30cm
